# Green Toilet
# Hinged Thermal Seat

Delivery contents:

- Heated seat, black
- Screws 2 pcs
- Covers for the screws 2 pcs

## Installation:

The thermal seat is installed on a flat surface on a wooden seat. If the seat opening is a different size than the thermal seat, it's good to align the openings from the front edge. Measure and mark the screws on the seat. Place the cover plates for the screws and fasten the seat by screwing. Attach the cover plates with screws on top of the stubs.

## Cleanup:

It's okay to clean the thermal seat regularly with water and a mild cleaning agent. When the seat starts to wear out, it's time to switch to a new one. You can place the old seat for plastic recycling.
