Whirlybird Installation Guide

Thank you for choosing the Whirlybird for your ventilation needs. This product is designed to enhance airflow through your waterless toilet or other small spaces like sheds or outhouses.

Installation Steps

Prepare the Ventilation Pipe:

Ensure that the 4” ventilation pipe is securely installed and is free of any debris or blockages.

The pipe should be properly mounted on the toilet system and the structure backwall (shed, outhouse, etc.) for a stable foundation.

Position the Pipe:

Roof Clearance: For optimal performance, the ventilation pipe should ideally extend above roof level, either through the roof or from the side of the roof. This helps to maximize its exposure to wind, as this will significantly enhance its ability to draw air.

Attach the Whirlybird:

Place the Whirlybird over the top of the 4” ventilation pipe, ensuring that the rotating cowl is positioned to catch the wind.

Make sure the Whirlybird is installed vertically straight to allow for smooth and efficient rotation of the cowl. Any tilt could hinder its operation.

Test the Rotation:

After securing the Whirlybird, check that the cowl rotates freely without obstruction. Adjust the alignment if needed to ensure smooth operation.

Maintenance:

Routine Check: Periodically check that the Whirlybird spins smoothly (in windy weather) and that no debris is obstructing the rotation.

Cleaning: Clean the Whirlybird’s surface with a damp cloth to remove dirt or build-up that could affect performance.

Lubrication: The Whirlybird is designed for maintenance-free operation, but in case of unusual friction, you can add a light lubricant to the rotating parts.

Your Whirlybird is now installed and ready to boost your ventilation system. Enjoy improved airflow and enhanced air quality!

Warranty: 1 year for purchase. This warranty does not include damage from misuse, abuse, vandalism, normal wear and tear, acts of God, or other forms of unreasonable damage. To claim a warranty, you must return the product to us with a copy of the purchase receipt.
