CF 4

Trusted, easy-to-use solution for clean, odor-free bathrooms

Waterless Toilet Shop

Discover waterless sanitation with the CF 4. Designed to deliver a premium toilet experience without the need for water, electricity, or complex infrastructure, the CF 4 combines modern styling with reliable performance.

Featuring a stylish porcelain toilet and a discreet underfloor waste management system, the CF 4 blends seamlessly into contemporary bathrooms while maintaining a fresh, odor-free environment. Its user-friendly design requires minimal waste handling, making it an ideal solution for tiny homes, cabins, holiday properties, and off-grid living.

Built for long-term reliability, the CF 4 offers a simple, low-maintenance alternative to traditional toilets. With no flushing required and only occasional servicing, it provides a practical and sustainable solution without compromising on comfort or convenience.

- 13" Below clearance required
- Single composting container
- Shipping from Nevada
- Certified to AS/NZS 1546.2

HOW THE CF 4 WATERLESS TOILET WORKS

1. Waste Collection
Waste is collected in a large integrated chamber beneath the toilet, keeping the bathroom clean, tidy, and free from the need for flushing or plumbing.

2. Natural Airflow
A simple ventilation system helps maintain a fresh, odor-free bathroom environment while supporting the natural treatment process inside the unit.

3. Low-Maintenance Operation
The CF 4 is designed for easy use and minimal maintenance. Adding a carbon material such as hemp or pine shavings from time to time helps keep the system operating efficiently.

4. Minimal Waste Handling
Over time, waste naturally breaks down inside the unit. The finished material is easy to remove when required, reducing handling and making ongoing maintenance simple and convenient.
