GL 55

Waterless Toilet Shop

Reliable easy-to-use system, Odor-free bathroom

Enjoy the comfort and convenience of waterless living with the GL series. Our innovative GL 55 model offers a sophisticated, easy to use design that includes a stylish porcelain pedestal that adds elegance to your bathroom, and external bins. No flushing is required.

When a container fills up, put it aside and leave to breakdown. Then, replace it with the spare fresh one. The finished material can be used in gardens or safely disposed of*. This design not only simplifies the service of the toilet but also significantly enhances user experience.

The GL 55 is perfect for full-time use of 1-2 individuals or 4-5 people for weekend use. This makes the GL 55 ideal for regular use in holiday homes, cabins, ADUs, and tiny houses with limited space below bathroom floor level.

- 22" Below clearance required
- 2 x Batch composting bins
- Shipping from Nevada
- Certified to AS/NZS 1546.2

HOW THE GL 55 WATERLESS TOILET WORKS

1. Easy Waste Management
The GL 55 uses two large-capacity 14.5-gallon bins with an easy swappable design, minimizing maintenance and reducing waste handling.

2. Fresh, Odor-Free Performance
Flexible ventilation options, including a whirlybird, solar fan, or mains-powered fan, provide continuous airflow to help keep your bathroom fresh, comfortable, and odor-free.

3. Reliable Natural Processing
The system supports the natural breakdown of waste using simple organic cover material, creating a low-maintenance solution for off-grid living.

4. Less Emptying, More Convenience
Large-capacity bins and efficient waste reduction mean less frequent servicing and more time enjoying your tiny home, cabin, or off-grid property.
