GL 90

Reliable easy-to-use system, Odor-free bathroom

Waterless Toilet Shop

Enjoy the comfort and convenience of waterless living with the GL series. Our innovative GL 90 model offers a sophisticated, easy to use design that includes a stylish porcelain pedestal that adds elegance to your bathroom, and external bins. No flushing is required.

When a container fills up, put it aside and leave to breakdown. Then, replace it with the spare fresh one. The finished material can be used in gardens or safely disposed of*. This design not only simplifies the service of the toilet but also significantly enhances user experience.

The GL 90 is perfect for full-time use of 1-3 individuals or part-time use of up to 4 people. This makes the GL 90 ideal for regular use in holiday homes, cabins, ADUs, and tiny houses with limited space below bathroom floor level.

HOW THE GL 90 WATERLESS TOILET WORKS

1. Easy Waste Management
The GL 90 uses two large-capacity 24-gallon bins with an easy swappable design, minimizing maintenance and reducing waste handling.

2. Fresh, Odor-Free Performance
Flexible ventilation options, including a whirlybird, solar fan, or mains-powered fan, provide continuous airflow to help keep your bathroom fresh, comfortable, and odor-free.

3. Reliable Natural Processing
The system supports the natural breakdown of waste using simple organic cover material, creating a low-maintenance solution for off-grid living.

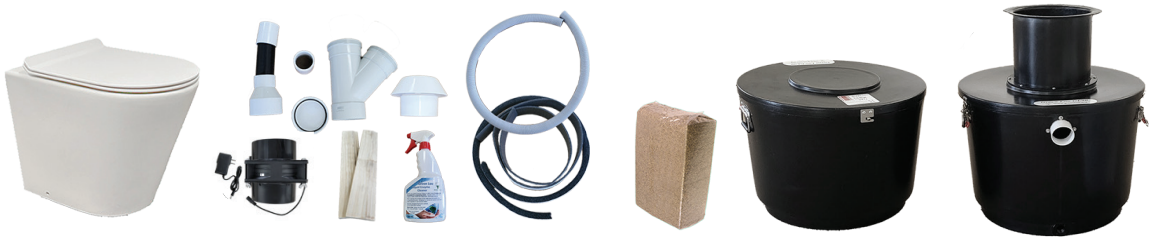

4. Less Emptying, More Convenience
Large-capacity bins and efficient waste reduction mean less frequent servicing and more time enjoying your tiny home, cabin, or off-grid property.
