Rota Loo

Reliable easy-to-use system, Odor-free bathroom

Waterless Toilet Shop

Enjoy the comfort and convenience of waterless living with the Rota Loo series. Our innovative 650 and 950 models offer a sophisticated, easy to use design that includes a stylish porcelain pedestal that adds elegance to your bathroom, and an external unit. No flushing is required.

When a container fills up, simply push it to the side to replace with a fresh empty bin. The bins are conveniently located within the unit to keep maintenance low and easy! The finished material can be used in gardens or safely disposed of*. This design not only simplifies the service of the toilet but also significantly enhances user experience.

The Rota Loo 650 is perfect for full-time use of up to 4 people. The larger Rota Loo 950 is suited for full-time use of up to 8 people. This makes it ideal for regular use in holiday homes, cabins, and for larger installations!

650 Model 26" Below clearance required

950 Model 38" Below clearance required

HOW THE ROTA LOO WATERLESS TOILET WORKS

1. Waste Collection
The Rota Loo uses 6 bins with an easy rotating design all conveniently located inside the unit, minimizing maintenance and reducing waste handling.

2. Fresh, Odor-Free Performance
Flexible ventilation options, including a whirlybird, solar fan, or mains-powered fan, provide continuous airflow to help keep your bathroom fresh, comfortable, and odor-free.

3. Reliable Natural Processing
The system supports the natural breakdown of waste using simple organic cover material, creating a low-maintenance solution for off-grid living.

4. Less Emptying, More Convenience
Multiple bins and efficient waste reduction mean less frequent servicing and more time enjoying your tiny home, cabin, or off-grid property.
